

General

AGCULTURE offers a broad portfolio of glass products and services suitable for greenhouse horticulture companies. The main business activity of AGCULTURE consists of developing, producing and selling glass solutions made of high-quality materials for greenhouse horticulture companies.

Compliance

- Our basic glass complies with EN 572-2 (latest version) – Glass in building – Basic soda lime silicate glass products – Part 2: Float Glass.
- Our thermally toughened products comply with EN 12150-1 (latest version) – Glass in building – Thermally toughened soda lime silicate safety glass.
- Our coated products comply with EN 1096 (latest version) – Glass in building- Coated glass.
- The performance of our products complies with NEN2675 +C1:2018 - Greenhouse glass - Determination of optical properties of greenhouse covering materials and screens.

Our values

AGCULTURE focuses on the following six values, which are shared by all AGC entities:

- **Safety & Environment:** Respect for everyone's safety, as well as the environment, is at the heart of AGC Glass Europe's mission.
- **Innovation & Operational Excellence:** Innovation and Operational Excellence are sources of competitive advantage and constitute the fundamental values of the AGC group.
- **Diversity:** The cultural diversity of the staff stems from the geographical extension of the company itself and its membership of a global group based in Japan. It is seen throughout the AGC group as a source of enrichment and progress for the organization.
- **Integrity:** Integrity in relationships with partners is a major concern for all AGC Group companies.

- **Sustainability:** Striving to deliver products and services which in one hand do not impact the nature and environment and on the other hand brings more sustainability for the user of these products and services
- **Curiosity:** AGCULTURE thrives on being curious about the unknown and put the questioning-learning-everyday mindset for its staff as a routine practice.

Vision

'To empower the grower for producing more and healthier crops while reducing their carbon-based energy resources'.

The core of this vision is the end user of our products, "Growers" and our everyday task is to help them provide more and healthier food for people while using the minimum amount of energy used per kilogram of food produced. This vision requires a continuous striving for improvement in products, services and processes. AGCULTURE will provide the necessary resources for this purpose.

By providing reliable and clear information, an honest and open relationship with partners in business combined with the competences and commitment of its employees, AGCULTURE faces the future with great confidence.

This policy statement has been communicated to all employees of AGCULTURE, is available on local posters and on the intranet site and will be evaluated on an annual basis. Every three years, a complete review takes place during the preparation of the management review for the previous year and, if necessary, this statement is updated and re-implemented.

Scope of the management system BRL 8001: 2015

'Advanced Glass Solutions for The Next Generation of Greenhouses'.

Mohammad Shayesteh
AGCULTURE Director
